

# Essential benefits of CI/CD to the Organization

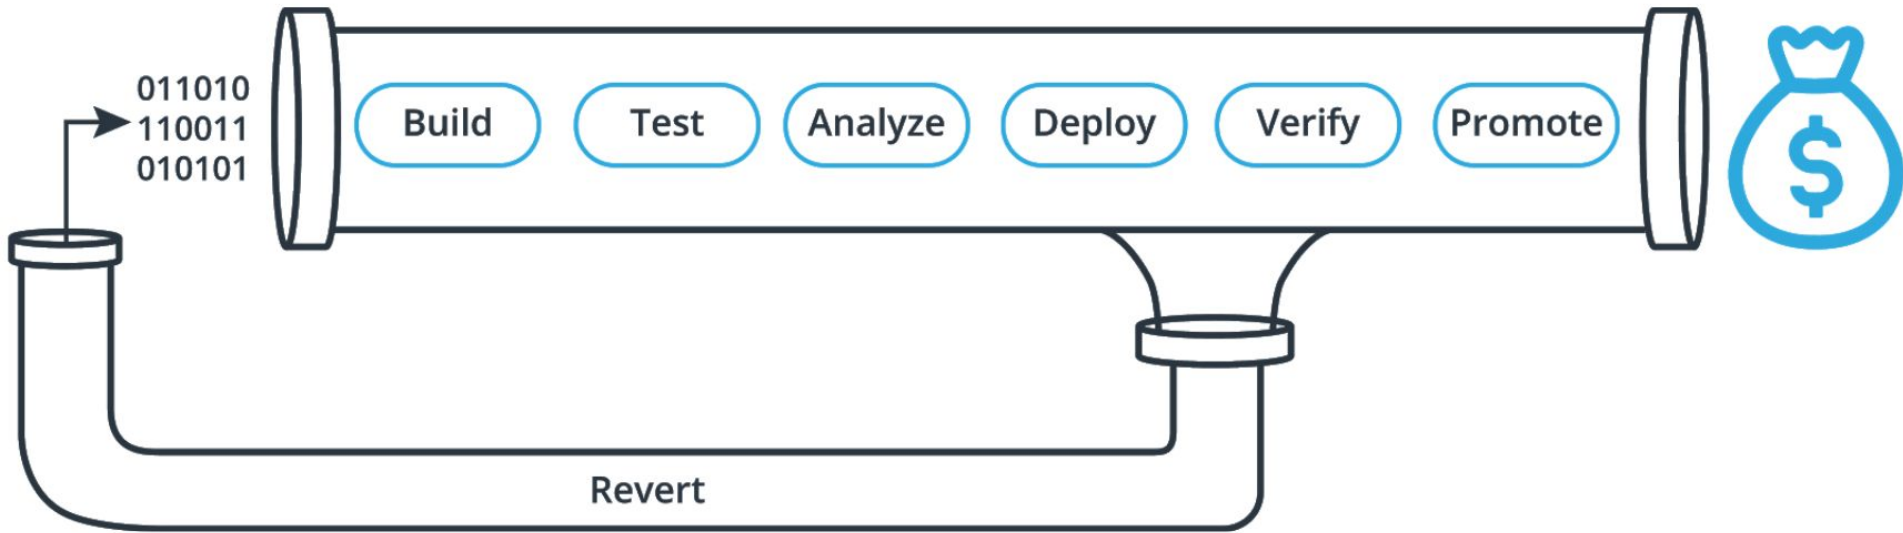

A presentation by Toluwalope Adeyemo

# Why CI/CD

CI/CD allows organizations to ship software quickly and efficiently. CI/CD facilitates an effective process for getting products to market faster than ever before, continuously delivering code into production, and ensuring an ongoing flow of new features and bug fixes via the most efficient delivery method

# The CI/CD Pipeline

# CI/CD benefits to the organization

1. Less developer time on issues from new developer code
2. Less bugs in production and less time in testing
3. Prevent embarrassing or costly security holes
4. Less infrastructure costs from unused resources
5. Less human error, Faster deployments
6. Less time to market
7. Reduced downtime from a deploy-related crash or major bug

# Values the organization stands to get from CI/CD

1. Reduce Cost
2. Avoid Cost
3. Increase Revenue
4. Protect Revenue

The image shows the silhouettes of four people sitting at a long table in a dimly lit room, looking out a large window. The view outside is a city skyline, with the prominent dome of St. Paul's Cathedral in London being the central focus. The scene is captured in a dark, moody style, with the interior lights being low and the exterior light coming from the window. The text 'THANK YOU' is superimposed in the center of the image.

THANK YOU
